

R-410A CERTIFICATION COURSE

Friday
August 25th, 2017

AS LOW AS
•269⁰⁰
PER PERSON

Become an R-410A Certified HVAC Tech

Because many HFC refrigerants, such as R-410A, operate at considerably higher pressures than many other refrigerants, safety training is imperative. R-410A systems will require service professionals to use different tools and equipment when installing, retrofitting, or repairing these systems. Currently HFC refrigerants, including R-410A, are not covered under the refrigerant sales restriction of the Clean Air Act Amendments, and, at this time the U.S. Environmental Protection Agency does not require or mandate a separate certification for the handling of these refrigerants.
